Procurement Process: RFP

Contract Summary: Support for application vulnerability management program that integrates key processes, personnel, and technology to address the aforementioned challenges. From a technical architecture perspective, a critical component in this initiative is an application vulnerability scanner. The application vulnerability scanner helps in identifying, prioritizing, and tracking vulnerabilities in both internally-developed and third-party applications. The WhiteHat Sentinel application vulnerability scanner solution includes Dynamic Application Security Testing (DAST) and Static Application Security Testing (SAST), maintenance, and training.

Note: Please reference the contract number on purchase requisitions, purchase orders, and when contacting the vendor.
